

Designed by Mark Müller and Christopher Wright

Honey 120° Workspaces

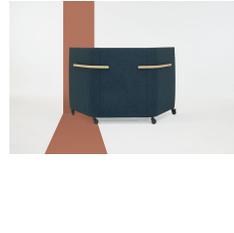

Honey won the prestigious award for Best of Competition and NeoCon Gold in the Furniture Systems & Enhancements Category for Best of NeoCon. Thank you to Christopher Wright and Mark Müller who designed such an innovative collection!

Honey workspace furniture addresses the needs of individual users, their varied work styles, privacy, and well-being. The space-efficient 120° planning grid creates a flowing geometry that meanders through a room with endless possibilities for configuring the workspace. Honey panels are soft and rounded with compound curved surfaces. The panel height of 55" gives the right amount of visual and sound privacy without overwhelming the space. Improved air quality is achieved through elevated panels that also allow for proper heat dissipation. Honey offers open and closed collaborative zones, meeting spaces, lounge, or desking in sitting, standing, or height-adjustable adapting to the way you work.

FEATURES & BENEFITS

- Visual privacy with 55"H panels
- Increased sound privacy through acoustical material in panels
- Height-adjustable or fixed tops
- Maintain or increase floorplan density
- Flexibility
- NRC .70
- Welltech Finish Technology compliant with ANSI/BIFMA X7.1 - Low VOC Emissions
